

# Bag Emptying System

## Key Features

- Empty sacks of all types and sizes
  - Paper, polyethylene, jute, sisal, and composites
- Capacities up to 1,200 bags/hr
- Sturdy, dependable construction
- Easy access, low maintenance design
- Minimal product loss and dust-free
- May be fully integrated into existing lines

## Typical Applications

- Coffee Beans
- Cocoa Beans
- Various Food Ingredients
- Rework

## Overview

Bauermeister bag emptying systems slit and empty bags of all types and sizes—paper, polyethylene, jute, sisal, and composites.

The extremely robust construction withstands the rigor of consistent operation, handling capacities up to 1,200 bags/hr.

Simplistic in design, there are few moving parts for more reliable operation and easy maintenance.

Bauermeister systems have minimal product loss, are dust-free, and may be fully integrated into existing production lines.
